

"They put me in a positive direction"

INSTRUCTIONS FOR EMBEDDING VIDEOS BY LSA IN YOUR WEB PAGE

1. Go to LSA's YouTube page and find the video that you want to embed.

[HTTP://WWW.YOUTUBE.COM/PROFILE?USER=LSAFHS](http://www.youtube.com/profile?user=LSAFHS)

2. Look for the box directly to the right of the video. Not only does this box let you subscribe to videos, it also gives you the code for embedding video.
3. Go to the line marked Embed at the bottom of this box. Click inside the code box next to the word Embed. All of the code text should automatically be highlighted. If not, you'll need to select it. Copy this code. You can copy by right-clicking on your mouse and selecting copy from the drop-down menu.
4. Copy and paste this HTML snippet into your website or blog to insert the video player directly into your page. This way, visitors will be able to play the video without leaving your site. You may alter the size of the video (by changing the width or height).
